EDUCATION

Satyawati College Delhi University, Delhi

BA program (Economics and Political Science)

NOV 2020-JUL 2023

Indra Gandhi National Open University, Delhi

BCA (Bachelor of Computer Application)

JAN 2024-PRESENT

ACHIEVEMENTS

• LeetCode

Solved 390+ Question, Earned 12 badges and Actively Participant in Daily Challenges

Relevant Coursework: Java, MySQL

JUL 2024-PRESENT

• Coding Block, Delhi

DSA (Data Structure and Algorithm)

JUL 2023-JUL 2024

Relevant Coursework: Array, Linked List, Stacks, Queues, Trees, Graphs, Hash Table, Priority Queue, Sorting Algorithm, Searching Algorithm, Time and Space Complexity

• Coding Block, Delhi

Data Science and Machine learning

APR2024—MAR2025

Relevant Coursework: Python Programming, Statistics & Probability, Linear Regression, Decision Tree, Random Forests, KNN, NLP, CNN, RNN, SVM, TensorFlow/Keras, CRUD

PROJECTS

DSA PROJECTS

- Number Game: Created an interactive game using arrays and functions
- Student Grade calculator: Designed a tool to calculate student grade using arrays and OOPS principles
- ATM Interface: Implemented an ATM interface with string manipulation and constructors

WEB DEVELOPMENT PROJECTS

- Portfolio Website: Developed a personal portfolio website showcasing qualifications, projects, and personal details using a responsive design with HTML and CSS. Designed an intuitive navigation bar with icons for different sections.
- Trendify E-Commerce Website: Developed a responsive e-commerce website for Trendify, showcasing a wide range of products with user-friendly navigation using HTML, CSS, and JavaScript. Designed an intuitive navigation bar with icons for Home, Shop, Cart, About, and Contact sections. Implemented a product catalog grid and a simple cart functionality to enhance the shopping experience.

DATA SCIENCE AND MACHINE LEARNING PROJECTS

- MNIST Digit Classifier: Built a handwritten digit recognition model using the MNIST dataset with machine learning algorithms and deep learning techniques.
- Image Recognition System: Developed an image classification system leveraging CNNs and data augmentation methods for improved model accuracy.
- K-Nearest Neighbors (KNN) Classifier: Implemented KNN algorithm for classification tasks, focusing on hyperparameter tuning and evaluation metrics.
- K-Means Clustering: Applied K-Means algorithm for unsupervised clustering of image data, optimizing the number of clusters using the elbow method.
- Linear Regression Analysis: Conducted regression modeling to predict continuous variables, emphasizing feature selection and model evaluation.
- Decision Tree on Categorical and Numerical Data: Built and analyzed Decision Tree models for datasets containing both categorical and numerical features, applying pruning techniques for better generalization.
- CIFAR-10 CNN Model: Designed a Convolutional Neural Network (CNN) to classify images from the CIFAR-10 dataset, improving performance through dropout and batch normalization.

TECHNICAL SKILLS

- **Programming:** Java, C/C++, Python (NumPy, Pandas)
- **Data Management:** MySQL
- **Tool and Platform:** Git, GitHub, Jupyter Notebook, VS Code
- **Web Dev:** Html, CSS, JavaScript
